Sand Canyon Road Improvements

San Bernardino County Supervisors approved plans and the advertisement of bids for a slurry sealing project on Sand Canyon Road, from the Yucaipa City Limits to Crafton Avenue.

“This is a win-win situation for the residents, taxpayers, and drivers in the area because it will protect and prolong the pavement,” said Third District Supervisor Dennis Hansberger. “It will not only make the roads better and safer, but it will save valuable resources and time so the pavement lasts longer.”

The project will consist of repairing potholes, sealing cracks wider than one-quarter inch, and placing a final slurry seal cover over the road.
